

Work Experience:

Staff Software Engineer, Deloitte

Feb 2022- Present

- **Humana:** Led architecture and delivery of an MCP-based prior authorization platform integrating X12 workflows across 3 enterprise systems; launched MVP in 5 weeks and cut referral processing time by ~20 min/case.
Tech: Node.js, Express, React, Jfrog, AWS, PostgreSQL, Azure DevOps, Helm charts, Argo CD, Kafka, Docker
- **State of Illinois – Disease Surveillance System:** Designed cloud-native HL7 rule-processing services and AI/RAG pipelines using AWS Bedrock to automate disease detection, eICR/eLR processing, and case triage across 3M+ records.
 - Owned event-driven microservices architecture artifacts including UML, sequence diagrams, data-flow diagrams, service contracts, and system integration designs across multiple engineering teams.
 - Led execution for a 10+ member team, API designs, Messaging Systems, Caching, improving operational efficiency by 20% and securing 2nd place in Deloitte's 2024 AWS Innovation Challenge.**Tech:** Java, Spring Boot, React, Python, FastAPI, MongoDB, JUnit, Prompt orchestration, BedRock, Vector databases, LLM
- **CDC – Vaccine Administration Management System (VAMS | Vsafe):** Modernized HIPAA-compliant national vaccine administration tools to address data management, reporting, and scalability challenges.
 - Delivered a rehosted, cloud-optimized system with architectural improvements, achieving \$50M in cost savings.**Tech:** Node.js, Express, React, JavaScript, TypeScript, TailwindCSS, Material UI, GraphQL, Jenkins
- **Meta (Facebook):** Built a self-guided onboarding module for Meta's large-scale ad analytics platform using Hack, React, GraphQL, and ENT Framework, enabling seamless user onboarding and analytics workflow integration.

Engineering Manager / Founder & Tech Lead, [JobMinglr](#)

2023 – Present

- Architected and deployed a full-stack, serverless AWS application (React, Node.js, Lambda, CloudFormation).
- Designed candidate-resume matching algorithms and integrated ATS platforms (Pinpoint, Greenhouse)
- Increased recruiter screening speed by 20% and candidate match quality by 15% through GenAI parsing and fit-score optimization.
- **Tech:** React, Gatsby, Node.js, Express, AWS (S3, Lambda, CloudFormation), ATS Integration, GenAI

Senior Software Engineer, John Deere

Aug 2020- Feb 2022

- Engaged 8+ cross-functional teams in developing a procurement transformation initiative that resulted in \$1.5M in operational savings each year.
- Led cross-team collaboration efforts between engineering, procurement, and finance to translate business needs into technological roadmaps.
- Championed infrastructure process improvements, resulting in a 15% increase in team efficiency.
- **Tech:** Java, Spring Boot, JPA/Hibernate, React, Node.js, AWS, JUnit, DynamoDB, GraphQL, Docker, Terraform

Software Developer, University of Texas

Feb 2019- July 2020

- Migrated academic system to cloud and built full-stack application improving scalability and reducing downtime by 30%.
- Partnered with stakeholders from different departments to manage the database and servers

Software Developer, Hitachi Payment Services

Feb 2018- July 2018

- Built POS transaction services and ISO-8583 protocol, optimizing multi-threaded logic to reduce transaction latency.

Senior Software Engineer, Capgemini

Aug 2014 – Feb 2018

- **Volvo:** Created ANDON for manufacturing systems for automotive plants reduced business handling effort by up to 30%.
- **Tech:** Java, Spring Boot, JUnit, Maven, MySQL, Oracle, Elasticsearch

Education Qualification:

Master's of Science, Computer Science, University of Texas

Technical Skills:

- **Technical Program Management & Methodologies:** Distributed Systems, Agile/Scrum ceremonies, cross-functional coordination, issue tracking, documentation, Risk mitigation, JIRA, Confluence, Trello, GitHub, Azure DevOps, Rally, Slack.
- **Cloud Infrastructure & DevOps:** AWS, Azure, Performance optimization, security vulnerability resolution, cost efficiency.
- **Programming & Development:** Java, JavaScript, Python, React, Spring, Maven, Git, microservices, Docker, Kubernetes, REST APIs, JSON, XML, workflow automation, LLM integration, Generative AI, Agentic AI, Terraform, Jenkins, CI/CD
- **Data:** MySQL, PostgreSQL, Oracle, DynamoDB, MongoDB, high-performance database solutions.
